Art Unit: 3653

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 through 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to provide a description of the structure which locks and unlocks the second movable part of the stripper to allow for second movable part to be locked in the strip-out position and to be moved along with the rotating stacker wheel in the not-locked state.

3. Applicant's arguments filed 4 January 2007 have been fully considered but they are not persuasive. Applicant has argued that the specification clearly teaches several different embodiments of a lockable stripper which is locked in its strip-out position by a release mechanism. The examiner agrees with applicant that there are a number of embodiments disclosed, however; the structure of the release mechanism to lock the stripper has not been sufficient disclosed to permit one of ordinary skill in the art to make and use the release mechanism in to lock and unlock the stripper. If such structure is conventional, examples of such structure should be given to permit one of ordinary skill in the art to understand how to make and use the release mechanism.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
